

Containment Booms

Our C-STORAGE Containment Boom Storage and UB510 Universal Boom are essential solutions for managing spills in various environments. The C-STORAGE unit provides a secure and durable fiberglass storage solution for up to 100 feet of containment boom, while the UB510 boom offers a highly effective response to large spills, capable of absorbing a significant amount of liquids. Together with our comprehensive Shop Spill Kit, they create a robust spill response system that ensures safety and compliance.

Key Features & Benefits:

C-STORAGE Containment Boom Storage

- **Durable Construction:** Made from fiberglass, it withstands harsh conditions, including saltwater spray, ensuring long-lasting performance.
- **Capacity:** Stores up to 100 feet of containment boom, keeping spill response equipment organized and readily accessible.
- **Portability:** Easily transportable with forklifts, motorized units, or utility trailers, allowing for quick deployment during emergencies.
- **Compatibility:** Designed specifically for 10" or 18" containment boom sizes, ensuring a perfect fit.

UB510 Universal Boom

- **High Absorbency:** One boom can contain and soak oils, coolants, solvents, or water, making it highly efficient for large spills.
- **Durable Design:** Constructed to prevent shedding even when saturated, ensuring a clean and effective response.
- **Retrieval Ease:** Comes with a nylon rope and sturdy hardware for easy handling and retrieval after use.
- **Expandable System:** Connect multiple booms using connectors to create a containment system suitable for spills of any size.
