

Pressure Washers

Overview

Unbeatable versatility – high-pressure cleaning with Kärcher. Kärcher invented the high-pressure cleaner in 1950 and has been refining the principle of high-pressure cleaning ever since. Greater cleaning performance with less consumption. Longer service life with shorter cleaning times. As a world market leader, Kärcher offers a range of products that leaves nothing to be desired in terms of technical refinement and versatility – operating with heated or unheated water, powered by electric motors or internal combustion engines, mobile or stationary. Find out about the different areas of use here.

Cold water high-pressure cleaners

Cold water high-pressure cleaners - cold shower for stubborn dirt. Clean machines, vehicles and buildings daily: with pressure and a high flow rate, cold water high-pressure cleaners can also remove stubborn dirt. Ideal for large surface areas.

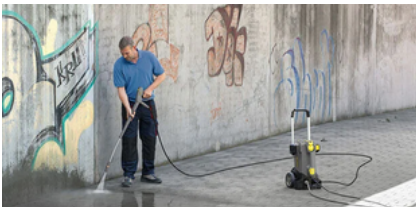

Super class

The best in their field. Our super class cold water high-pressure cleaners are used wherever uncompromising maximum performance is required. With their robust and durable design, they are perfectly equipped to remove even the most stubborn dirt. Whether in agriculture, on the construction site, in industry or municipal use – maximum performance is required. Pressure, flow volumes and super class equipment are perfectly matched.

Middle class

Well equipped for long and heavy-duty use: Cold water high-pressure cleaners in the middle class clean machines, vehicles or company premises quickly and reliably.

Compact class

Light and powerful: these compact, all-round cleaning machines clean courtyards and workshops in next to no time. They excel with pressure, flow rate and working time.

Portable

The new Kärcher portable cold water high-pressure cleaners are lightweight and compact. These machines are easy to transport and the ideal mobile companion for all locations of use.

Special class

Equipped for easy transport on particularly difficult surfaces: the special class from Kärcher removes stubborn dirt in difficult to reach areas.

Combustion engine

Where there is no power source, high pressure cleaners with combustion engine – with optional biodiesel operation – offer maximum versatility and independence.

Pressure Washers

Hot water high-pressure cleaners

With hot water, high-pressure cleaners clean even better with the same amount of pressure, Kärcher machines impress with the highest level of usage comfort and the most up-to-date technology.

Middle class

Cleaning on construction sites or in agriculture is hard work. Our Middle Class hot water high-pressure cleaners are designed to do just that. They either come with first-rate accessories and ergonomic handling or with a focus on ultra-simple operation and a robust design – depending on requirements. In any case, they always offer high quality and maximum performance – with max. 210 bar of pressure and a flow rate of 1000 l/h. These are the new Middle Class machines.

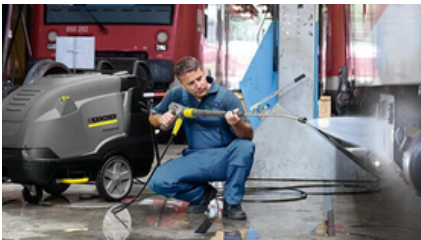

Compact class

Innovative technology – easy handling: the compact class features one-button operation, chassis with integrated tank and on-board high-pressure hose drum.

Upright class

These powerful and robust machines stand out due to their manoeuvrability and easy transport. This makes the upright class an economical alternative for diverse workshops, small garages and cleaning service providers.

Special class

When exhaust gases are to be avoided or prohibited: the special class with electric heating is used in hygiene areas, hospitals, canteen kitchens or public baths

Combustion engine

Where there is no power source, high pressure cleaners with combustion engine – with optional biodiesel operation – offer maximum versatility and independence.

Pressure Washers

Stationary

Stationary high-pressure cleaners – one basis, numerous locations of use Kärcher stationary high-pressure cleaners are suitable wherever it is necessary to clean and disinfect several areas in a space-saving manner.

Heats oil/gas

With oil or gas heated – let off steam safely Stationary high-pressure cleaners with oil or gas burner clean with hot water and steam. Maximum safety is not only ensured by the automatic safety relief.

Unheated

These stationary high-pressure cleaners do not heat themselves – but they tolerate a water inlet temperature of 60 to 85°C. Especially space-saving in single operation, but also ideal for multiple lance operation with up to 15 lances operated in parallel.

Booster heater

The electric flow heater is useful where no hot water is available and oil or gas heating cannot be used.

Pressure Washers

Pressure Washer Trailers

Kärcher's customizable mobile pressure washer trailers are rugged and convenient, featuring a large, onboard water tank for on-site cleaning. Kärcher pressure washer trailer models are certified by the National Association of Trailer Manufacturers (NATM) to meet requirements determined by the National Highway Traffic Safety Administration (NHTSA).
