

Baby Changing Stations

Baby changing stations provide a safe, clean, and convenient space for parents to change their child's diaper in public restrooms. They enhance the restroom experience and prioritize hygiene, safety, and accessibility.

Features

- Durable stainless steel or polypropylene surfaces.
- ADA and ASTM compliance for accessibility.
- Microban® antimicrobial protection to reduce bacteria.
- Built-in bag hooks and dual-cavity dispensers for convenience.

Benefits

- Improves restroom functionality for families.
- Hygienic and safe, reducing bacteria between cleanings.
- Compact and space-saving designs, ideal for any public space.

Types of Baby Changing Stations

- Horizontal Wall-Mounted: Offers a wide surface for easy access and comfort.
- Vertical Wall-Mounted: Space-saving design that fits in smaller restrooms.
- Surface-Mounted: Designed for efficient installation on restroom walls.
