

Expansion Joint Covers

SHP Joint Cover

Features:

- Surface-mounted for parking structures and vehicular access areas.
- Noise Reduction: Equipped with dampening pads and springs to reduce impact noise from vehicles.
- Movement Capability: Accommodates seismic and lateral shear movements, with models allowing up to 200% movement.
- Durability: Rugged design for long-lasting performance.
- ADA-compliant for pedestrian access.

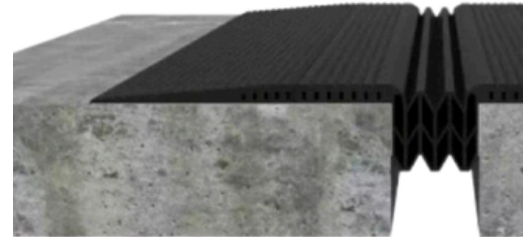

Applications: Parking structures, areas with vehicular traffic.

ZB Joint Cover

Features:

- One-Piece Design: Simplifies installation and eliminates the need for elastomeric concrete.
- Watertight System: Sealed with high-strength epoxy and urethane for durability and weather protection.
- Flexible Sizes: Available in multiple roll sizes (20' to 200').
- Low Maintenance: No mechanical fasteners required.

Applications: Ideal for parking structures, stadiums, and other areas exposed to moisture and heavy traffic.

RFA Joint Cover

Features:

- Restofit[™] Line: Designed for both new and retrofit applications, resistant to wear from rolling loads and environmental stress.
- Slip-Resistant: Features serrated covers to prevent slips in high-traffic areas.
- Interlocking Design: Allows for horizontal movement and minor vertical deflection.
- Low Maintenance: Minimal upkeep required for long-term use.

Applications: Suitable for interior and exterior spaces with moderate movement and rolling loads, such as shopping centers or transportation hubs.
