

Forklift Bins

Forklift Bins come equipped with slots on all four sides making them easy to lift, and maneuver with any forklift machine. TECHSTAR'S[™] Forklift Bins both nest when empty and stack when full, making them perfect for minimizing storage space and shipping costs. Each corner has barrel type nesting stops, ensuring a secure hold when nested. As an added bonus, both the bin and the lid are seriously tough, allowing you to stack them on top of one another. Model 4900 is not pallet truck accessible. Options: lids available at extra cost. (lid option shown)

Features

- **Forklift Compatibility:** Equipped with slots on all four sides, our Forklift Bins are designed for easy lifting and maneuverability with any forklift machine, enhancing operational efficiency.
- **Nesting and Stacking Capability:** These bins nest when empty and stack securely when full, maximizing storage space and minimizing shipping costs.
- **Secure Nesting:** Each corner features barrel-type nesting stops, ensuring a stable and secure hold when bins are nested together.
- **Robust Construction:** Both the bin and lid are built tough, allowing for safe stacking of loaded bins, optimizing storage and organization within your facility.
- **Model Specifics:** Model 4900 is designed for forklift use only and is not pallet truck accessible, offering specialized functionality for specific operational needs.
- **Customization Options:** Optional lids are available at an additional cost, providing added protection and versatility for your stored materials (lid option shown in images).
