

## Gym Lockers

- Upgrade your gym with our robust and secure locker solution, designed for heavy-duty use in demanding environments such as locker rooms and sports facilities. Crafted from high-quality materials, these lockers are engineered to withstand daily wear and tear while ensuring the security of personal belongings.

### Built to Last

- Our gym lockers feature 304 stainless steel doors that are both resilient and attractive, available in a range of contrasting colors to complement any facility's decor. Each locker door is constructed with a 1.90 mm (14 gauge) outer panel and a 0.91 mm (20 gauge) inner panel, welded together for enhanced durability and vandal resistance.

### Secure and Maintenance-Free

- Equipped with a continuous one-piece integral hinge and frame, our lockers ensure smooth operation and longevity. The single point latching mechanism, featuring a deep-drawn 304 stainless steel recessed pocket, provides secure closure and peace of mind. Choose from a variety of locking options including padlocks, cylinder locks, or built-in combination locks to suit your security needs.

### Specification

- Material: 304 Stainless Steel Doors, Prepainted Steel Bodies
- Frame: Welded from prime cold rolled steel with rubber door grommets and ventilated slots
