

Lift Tables

Lift tables are essential ergonomic solutions designed to enhance material handling processes in various industrial and commercial environments. They provide efficient lifting and lowering of heavy loads, promoting a safer and more productive workspace. Whether for assembly, loading docks, or maintenance tasks, lift tables cater to a wide range of applications, ensuring optimal accessibility and reducing physical strain on workers.

Key Features

- **Versatile Capacities:** Available in a wide range from 250 to 50,000 lbs to meet diverse operational needs.
- **Adjustable Height:** Raises loads up to 96 inches, providing easy access for operators.
- **Easy Loading & Unloading:** Designed for ground-level access with roll-on and roll-off capabilities.
- **Mobility Options:** Wheel-mounted designs offer enhanced flexibility and maneuverability.
- **Smooth Operation:** Engineered for safe and efficient lifting with user-friendly controls.
- **Power Versatility:** Various power options available to suit different environments.
- **Safety Features:** Includes guard rails, non-skid surfaces, and hydraulic safety measures.

Benefits

- **Injury Prevention:** Minimizes the risk of worker injuries by eliminating manual lifting and reducing physical strain.
- **Increased Productivity:** Streamlines workflow by placing work within easy reach, enhancing efficiency and worker morale.
- **Ergonomic Design:** Reduces fatigue associated with bending, stretching, and lifting, leading to a healthier work environment.
- **Cost-Effective Solution:** Saves time and resources by optimizing material handling processes and improving overall operations.
- **Durable & Reliable:** Built to withstand demanding industrial environments while requiring minimal maintenance.

Zero-Low Lift & Tilt Tables

Ergonomics at its Best! Backsaver!

- 250 to 6,000 lb. capacities, up to 46 in. lift
- Table tilts up to 45 degrees for load handling ease
- Lifts load from ground level to desired height and then tilts the load for easy handling. (tilt up to 90° available at reduced capacity, ask for more details).
- Increased worker productivity and morale
- The Zero-Low Lift & Tilt Table puts work within easy reach of the worker for increased productivity, safety, and morale.
- Reduces fatigue and increases worker safety
- Virtually eliminates bending, reaching, stretching and lifting, reducing worker fatigue and the risk of back injuries.

Lift-and-Tilt Tables

Ergonomics at its Best! Backsaver!

- Up to 10,000 lb. capacities, up to 60 inches raised height, tilts up to 45°
- 90° tilt available as option for table use as coil or crate upender (capacity drops 50% on tilts greater than 45° and 75% at 90° tilt).
- Hydraulic power source and control remotely located
- 8 in. retaining plate
- Larger retaining plates available.
- This table must be fastened to the floor before use. Outriggers available—for added stability
- Required on mobile tables with greater than 45° tilt.
