

Lifting Beams

Complete Lifting Stabilization

Our lifting beams or spreader beams are designed for applications where there are multiple pick points. The lifting beam is attached to your existing crane by the hook to provide you more stability.

Features

- Swivel hooks with hook latches
- Fixed or adjustable hook positions
- Designed and manufactured to ASME B30.20
- Safety yellow oil base paint finish

Configurations

- Coil lifting beams
- Magnet beams

Monorails

Monorails: Simple Lifting with One Beam

Monorails overhead systems are a simple lifting device with one stationary beam that has a hoist and trolley. With its lightweight design, it can deliver materials from one specific location to another at relatively quick speeds.

Our highly skilled engineering staff can customize your monorail with curved tracks, multiple switches, and interlocks.

Our monorail system comes in two designs, ceiling and floor mounted.

Features:

- Capacities up to 20,000 lbs
- Runway supports up to 30 ft
- Curved section tracks available
- Low cost
- Free standing and ceiling mounted designs
